

DOG HELPED TO SAVE LIVES

Awakened inmates of Burning House
at 3 a.m. on Sunday—Family
Escaped But Lost Everything.

The sagacity of a 15-year-old dog probably saved the lives of Fernand Mary, his wife and 5-year-old child on Sunday morning at 3 o'clock, when it awakened them to find their house in flames, and from which they had barely time to escape in their night clothes and a few articles of clothing hurriedly snatched from their bedrooms.

Mr. Mary, relating the incident, states that the dog came to the bed and by pawing at the bedclothes and barking awakened them, and that had they been two minutes later in being awakened, it is doubtful if they could have escaped, as the house with its total contents was destroyed in a very short time. He could give no reason as to its origin, as only a few days before they had taken extra precautions during the cold spell by placing asbestos covering in places near the stove pipes. The loss was partly covered by insurance, but despite this his loss will amount to between \$1000 and \$1500.

Speaking of the dog, he said he had considered destroying it prior to the fire, on account of old age, but nothing could make him part with it now and it is now regarded as the family hero.

HISTORY OF KOOTENAY

A very interesting series of articles on early times in the Kootenays was recently concluded in the Cranbrook Courier, written by a Mr. Smyth, and which were read with intense interest by many. They give some very interesting sidelights on many of the early residents and pioneer businessmen of the south-eastern portion of B. C., and the lucid style of the writer added to the general interest. Such reminiscences are very valuable and should prove a valuable addition to the historical records of British Columbia.

RED CROSS ANNUAL MEETING

The program of proceedings of the annual provincial meeting has been issued, which opens in Edmonton on Feb. 23. The early part of the proceedings, which will include a full report of the year's work, will be broadcasted through CJCA commencing at 10:15 a.m., states Capt. A. C. L. Adams, commissioner of the Red Cross of Alberta.

TREATING 'EM ROUGH

Some time ago a high officer of a fraternal society visited town, and left his hat and coat in the outside room adjoining the lodge room. During the proceedings it was stolen, and no clue was obtained as to the thief. There have been many instances of pilfering and stealing from cloak rooms and the first offender caught will be made an example of, with no option of a fine, but a sojourn in jail.

HOCKEY

PINCHER CREEK VS. COLEMAN

COLEMAN ARENA RINK
Fri., Feb. 15, at 8 p. m.
Adults 35c Children 15c

Pincher's first visit this season to Coleman. Turn out and see a good game.

Mid-Winter Golf Tourney at Victoria, B.C.

These photographs were taken on the beautiful Colwood Golf Course, Victoria, B.C., where the first Empire Hotel mid-winter golf tournament for the E. W. Beatty challenge trophy, will be held during the week of February 18. These pictures, taken on the 15th of January, give some idea of the sunny aspect of Victoria's mid-winter weather. The hard-wood foliage is shed in the fall in elsewhere, but there is a wealth of evergreen at Victoria to make the fairways attractive and at no time during the winter is there sufficient moisture to spoil a round or to ruin the greens if played over.

a round or to ruin the greens if played over.

Ambulance Assoc. Examinations Held

Many Young Men Awarded Certificates in First Aid Examinations.

The following awards were made as a result of examinations in first aid under the auspices of the St. John Ambulance Association:

Certificates
Havelock A. Hulbert, Andrew Salmea, Andrew J. Borhala, Mike Leper, Peter Oliva, John Rushton, Jr., Geo. P. Derbyshire, Cyril Hibbert, Alfred J. Phillips, Melville Cornett, James Kilgannon, Scott McLinnick.

Medallions
Hugh J. Dunlop, George A. Brown, James Kellock, John Goulding, Jas. Hart, Harold Chamberlain.

William H. Correr, Ernest V. Hill.
The examinations were conducted by Dr. Rose, of Hillcrest, and he was assisted by Moses Johnson, district mines inspector; Mr. Healey, Edward Royle, superintendent of the Mines Rescue Car, and R. M. Greenhalgh.

At the whist drive in the K. of P. hall on Saturday 19 tables were in play, the prize-winners being Mrs. W. Bell, Mrs. R. Brown, H. Snowden and Mrs. J. Chalmers. Mrs. Sall's three-piece orchestra furnished the program for an enjoyable dance to conclude the evening.

Shrove Tuesday was observed by the ladies of Minerva Chapter, Eastern Star, by a pancake tea at Mrs. W. L. Rippon's house, when quite a number of ladies called and observed the age-old custom of eating pancakes. This custom is very prevalent in England, especially in the schools. To successfully flip a full sized pancake is a feat to be proud of.

Mrs. Harry Boulton and son Foss will sail from Liverpool by the S. S. Antonia of the Cunard line on March 2, after visiting relatives in Wales and England since last July. Mr. Boulton will leave the latter part of February to meet Mrs. Boulton and they will spend a holiday at his old home in Perth, Ontario, returning to Coleman in April.

Belle Flynn has as her guests over the week-end a number of her girl friends from Blairmore.

Personal and Local Hospital Report For Month of January

Mr. and Mrs. Geo. Kellock and son spent the week end in Calgary, where their daughter is attending Mount Royal College.

Mr. and Mrs. Roland Laslett have moved into the house which has been recently purchased from Mr. W. S. Purvis, located on Third Street.

James M. Fulton has again taken over the duties of leader of the Coleman Amateur Orchestral Association, which will be good news to all interested in local musical organizations.

A successful merchandiser says "do not underestimate the tastes of your customers." They want something better than what they have been accustomed to. Human nature is built that way, and in merchandising this trait must be recognized.

A very enjoyable dance was held in the Polish hall on Monday evening. Mrs. Altematt's orchestra furnished the musical program. The Polish school has a very nice hall in East Coleman which enables them to hold some very successful social evenings and dances.

Bad Clarke of the house committee, K. of P. hall, has been making improvements. A checking room has been added, so that people attending concerts and socials may leave their hats and coats in safe keeping for a small charge. This will be appreciated by the public and members.

At the whist drive and dance of the Oddfellows and Rebekahs last Saturday evening the prize-winners were Mrs. J. Rogers, Mrs. T. Bowen, John D'Andrea and J. Emmerson. The usual social will be held this Saturday evening, commencing at 8 o'clock and dancing from 10 till 12.

Everybody who uses the hill from Fourth street to Sixth street remarks that ashes or gravel is needed to make it safe, but it is a case of letting George do it. As it is a public walk, the responsibility is on the works committee of the council. It might spoil the slide for the children, but broken limbs or other accidents are far too costly for the town to incur any unnecessary liability in neglecting to make it safe.

132 Out Patients Treated and 25 Operations in Month—T. Proudlock in Serious Condition

Number in hospital, Jan. 1. 23
Admitted during January. 11
Total treated. 34
Operations (in patients). 25
Operations (out patients). 132
Treatments (out patients). 132

The following are still in hospital: R. Anderson, operation for blood-poisoning; Mr. Davis of Blairmore, operation on hand; Robert Wilson, injured in McGillivray mine by fall; Mike Polak, pneumonia; John Pedocuk, injured hand.

Thomas Blower, who was in for an operation, was discharged on Monday. Mr. Martelli, a patient since October, was discharged on Monday. Mr. Groat, in for eight weeks, has been discharged, and Mr. Toppo, crushed foot, was discharged.

Thomas H. Proudlock, injured by a fall of logs on Jan. 15 at the McLaren camp near York Creek, is in a very serious condition at time of report (Tuesday). Amputation of the right foot was decided on by the doctors on Monday, which was a severe tax on the patient, who is 60 years of age. His wife died a number of years ago, and he has not been in touch with his sons for many years. A son was living in Victoria, B.C., and was last heard from in 1923, when he was employed as a brakeman on the C.P.R. The old gentleman is very desirous of getting in touch with his son or any other relative.

ST. ALBAN'S CHURCH, COLEMAN

Sunday, Feb. 17, Sunday School at 2:30 p.m.; evensong 7 p.m.
At evensong the rector will give a short account of the Synod's proceedings.

On Sunday, Feb. 24, the Bishop will celebrate Holy Communion at 9 a.m. and preach at evensong at 7 p.m.

Twelve tables were in play at the Elks whist drive last Friday night, and a very enjoyable dance was held after the whist games which continued till 1 a.m. The prize-winners were Mrs. W. Bell, Mrs. W. L. Rippon, C. Flower and A. E. Graham.

Frank Celli of Creston, B.C., is a business visitor in town in connection with the Palm Cafe.

TELEPHONE SERVICE DISRUPTED BY FIRE

Cable Connecting Coleman with Central Office at Blairmore Severed by Sunday Morning Fire.

The main cable of the local telephone and long distance lines was severed by the fire at Blairmore on Sunday morning, and repairs are proceeding. The cable passed directly over the house of Fernand Mary, which was destroyed, completely isolating Coleman as far as telephone communication was concerned. This is the second time in a little more than a year that telephone communication has been disrupted by fire, the previous occasion being when the telephone central office in Blairmore was burned.

PROVINCIAL SAVINGS CERTIFICATES POPULAR

That Alberta Provincial Savings Certificates are recognized as a sound investment is indicated by the fact that sales during 1928 reached a total of \$815,560 over and above all withdrawals. The net purchases during the year were more than double those of 1927. The report for the year by the Treasury Department places the total amount of outstanding savings certificates at \$11,264,946.

BLAIRMORE BONSPIEL OPENS WED—3 RINKS FROM COLEMAN

The rinks from Coleman Curling Club, who will participate in Blairmore's annual bonspiel will be as follows: H. Boulton (skip), J. Bell, J. Houghton, W. Bell, H. C. McBurney (skip), E. Leduc, W. L. Rippon, J. Emmerson, S. Moore (skip), Wesley Johnson, A. N. Other.

Correction
It was not Jack Bell's rink which won the Morrison Cup, as reported last week. Be it known to all and sundry that it was William Bell who skipped the winning rink.

Bellevue Challenged
The Burns Cup, at present held by Coleman Curling Club, was challenged for by the following rinks: Bellevue on Saturday last: Wm. Kerr and Harry Blake. Coleman rinks were skipped by S. Moore and E. Leduc. The total points were 25-18 in favor of Coleman. Wm. Lees states that Bellevue were good curbers—but Coleman were just a little bit better.

CITIZENS BAND WILL RE-ORGANIZE

Secretary Albert Morris of the Citizens Band states that re-organization will take place as soon as the names of players are handed to him, as it is the intention to have a better band than last year to compete in the band competition held in connection with the annual exhibition and stampede at Calgary.

Last year Coleman were given third place. This year they hope to make a much better showing, as they have a number of reed players, which will greatly improve the general effect of the music, and will earn them more points in band competitions. Names should be given to Mr. Morris, or James Fulton, who will again be the leader.

THE WEEK'S PROGRAM AT THE PALACE

In addition to the big feature of "Abie's Irish Rose" at the Palace on Friday and Saturday, next Monday a special will be shown entitled "Plastered in Paris," Sammy Cohen and Jack Pennick heading the cast. "The Grip of the Yukon" will be shown on Tuesday and Wednesday, with Neil Hamilton, Francis X. Bushman, June Marlowe and other stars. This is a Universal picture.

On Thursday night only (coupon night) will be shown Zane Grey's "Lightning."

NEZ PERCEE CREEK IS ICE-JAMMED

Barrier of Ice Causing Water to Flow into the Basements of Nearby Houses.

The intensely cold weather from Jan. 18 till Feb. 7 has been responsible for many troubles throughout the Pass. All towns from Kimberley and Cranbrook east to Hillcrest, Frank and Bellevue, have experienced the inconvenience of frozen water pipes, and electric thawing apparatus has been in operation day and night in some of the towns. The trouble is likely to continue for some time, as the frost is beneath the level of the pipe lines, and though pipes will be thawed out, in many instances they freeze up again shortly after.

The Nez Percee Creek, which runs through Flumerfelt park and through town into the Old Man River, is causing trouble to property owners on Third Street. The ice barrier formed at the bridge on Third Street is causing the water to divert its course and is flooding the basements of A. M. Morrison's and W. L. Rippon's houses, and there is danger of the ice lifting the cement tunnel under Fourth Street from its foundations.

This is the first time trouble of this nature has been experienced at this spot. On a previous occasion the creek went on the rampage following a cloudburst in the mountains, and flooded a section of the town.

200 CHILDREN HAVE PART IN "ABIE'S IRISH ROSE"

Some 200 children of the Los Angeles Orphan Asylum, broke into the movies during the filming of Anne Nichols' "Abie's Irish Rose" at the Paramount studios in Hollywood recently.

The youngsters worked in the school scenes in the early part of the story, the scenes which show the boy Abie getting his education. Leon Ransom, well known child actor, plays the part of the young Abie in these scenes. Later on in the story, however, Charles Rogers has the part. Nancy Carroll shared with Rogers, the other featured role with Jean Herschell.

J. Farrell MacDonald and others in the cast. The picture is showing at the Palace theatre Friday and Saturday.

The admission prices for "Abie's Irish Rose" on Friday and Saturday at the Palace are 50c and tax for each performance. The Children's matinee on Saturday at 2 p.m., 10c admission. The public should take advantage of Friday night's showing, as many advance seats have been booked for Saturday. Attend Friday and avoid possible disappointment. Special musical score with this picture.

"Abie's Irish Rose" was one of the best pictures ever brought to Cranbrook. It was a picture with a lesson and a moral, and gave a vivid illustration of the racial and religious prejudices which exist in the world today. It was clean and well acted, and the pity is that there are not more such pictures produced.—Cranbrook Courier.

"Know your druggist better—be your doctor's right hand man," states an advertisement. Which reminds us of a friend who after a very serious illness, became convalescent, and on his first walk the first man he met was the undertaker. The patient had a strong suspicion ever after that the undertaker had been on the lookout for prospective business.

Standard sizes in loose leaf binders can be supplied through The Journal office at reduced prices. Also indexes and sheets for same.

PALACE THEATRE

Paramount's Greatest Motion Picture

ANNE NICHOLS' FRI-SAT., FEB. 15-16

"ABIE'S IRISH ROSE"

NEW LEGISLATION ANNOUNCED IS NOT EXTENSIVE

Ottawa, Ont.—The speech from the throne with which His Excellency the Governor-General opened Parliament, consists largely of a review of the activities and accomplishments of the Government since the close of the last parliamentary session.

New legislation announced is not extensive. Amendments to the Dominion Elections Act, to the Companies Act, the Fisheries Act, the Narcotic Drug Act, and the act respecting technical education are pieces of new legislation to be forecast.

The speech also states that Parliament will be given an opportunity to approve the multilateral treaty for the renunciation of war, as well as the treaty providing for preservation of the scenic beauties of Niagara. Amendments to the Railway Act, which will grant to the railway commission powers of investigation of affairs in relation to subsidiary concerns and with respect to the issue of capital stock will be introduced.

One of the most important announcements connected with the speech is that legislation to provide for a general pensions scheme for the benefit of Canadian National employees will be brought down.

The speech expresses thankfulness for the recovery of His Majesty's, refers to the "unprecedented prosperity" of the Dominion, draws particular attention to the development of the mining industry, and suggests further legislation to implement recommendations of the Fisheries Commission. It states that plans for progress for the national research laboratories.

Reference is made to immigration agreements which have been concluded.

Announcement of the introduction of a further branch line program by the Canadian National Railways was also contained in the speech, and it is estimated that authority will be asked for the acquisition of certain railways in both Eastern and Western Canada as feeders of the government-owned system.

Better Relations Looked For

Balkan States Making Arrangements To Open Frontier

Sofia, Bulgaria.—After years of extreme tension and recurring frontier disputes, Bulgaria and Yugoslavia seem at last on the threshold of better relations.

The frontier, which has been closed for a year and a half, a situation which gave rise to bitter feelings in Bulgaria, is to be opened. Word of this was brought to M. Drot, foreign minister here. A mixed commission will meet at Sofia to draw up details of the frontier agreement. A formal commercial treaty between the two governments is expected soon to better trade relations.

Commission Now In Europe

London, England.—The Canadian broadcasting commission under the chairmanship of Sir John Ald, president of the Canadian Broadcasting Commission, left for the continent February 7. It is understood that the members have been favorably impressed by the British organization which yields a revenue of about \$5,000,000 yearly under government supervision, divided between the government and the corporation.

Silver Bullion Shipped

Halifax.—Included in the cargo taken aboard the Cunard liner "Aurania," which sailed for Plymouth and London, were 210 bars of silver bullion on London option, and 93 parcels of clothing for the miners' relief fund of the Lord Mayor of London. The first shipment for this purpose to go forward from Halifax.

King Signs Documents

London, England.—King George for the first time since appointment of councillors of state on December 4, has been able to sign several documents. It was officially stated that His Majesty signed two state papers appointing Justice Tomlin to be lord appeal in ordinary and member of the privy council.

Killed During Formation Flight

Pensacola, Fla.—Drauwel P. Howell, 24, and Andrew Brink, 21, attached to the aviation flying squadron here, were killed when their aeroplanes crashed in mid-air during a formation flight.

W. N. U. 1772

Seeking Right To Control Property

Shareholders Of Grand Trunk Railroad Lodge Petition With Government

Ottawa, Ont.—The shareholders of the Grand Trunk Railroad are seeking the recovery of their right to control the railway property, now an integral part of the National Railway system, or fair compensation for their shares.

To this end they have lodged a petition of right with the government at Ottawa, claiming a fiat to sue the Dominion of Canada for the restoration of their property.

The par value of the shares held by the shareholders amounts to about \$180,000,000, and presumably the alternatives before the government, if the law suit were successful, would be either to pay these shareholders \$180,000,000 or to surrender the Grand Trunk lines.

At the moment none of the ministers or deputy ministers concerned in this matter will discuss it.

Not Delaying Treaty

Suggestion That Canada Is Holding Up Arbitration Pact Is Denied

London, England.—The suggestion that Canada is delaying the arbitration treaty between Britain and the United States, was stated in authoritative quarters here to be groundless.

The reason for the delay is that Britain and the United States are anxious to get the Kellogg pact, upon which they have been concentrating for some time, out of the way first, but the conclusion of the arbitration treaty is expected before long.

Observations were received from Canada a few weeks ago, and the other Dominions have also sent their views.

It is admitted that the question of setting up the arbitration machinery has been a matter of some discussion, but no great difficulties are anticipated, and there is no particular hurry.

Nurses Called To

Paris From England

The Epidemic Has Reached Serious Proportions In France

Paris.—France's influenza epidemic has become so serious that it has been found necessary to import nurses from England.

This procedure ordinarily would be attended with endless red tape, but much of this has been dispensed with in the present instance to facilitate treatment of cases in Paris hospitals. In some cases the nurses have been able to get needed assistance by telephone within twelve hours from London.

One hospital authority estimated that about one-fifth of the Parisian population were affected.

Thus far most of the cases have been mild, but later reports show there has been an increase in pneumonia and bronchial symptoms following influenza. There has been a corresponding increase in the death rate.

Paying Visit To Japan

London, England.—The Duke of Gloucester will leave London at the end of March for Tokyo, to invest Emperor Hirohito, of Japan, with the Order of the Garter. Determination of the date of the duke's mission was stated to have been made possible "in view of the improvement in the King's health." The duke's party will arrive in Japan early in May.

New Experience For Italy

Rome.—Ice boats and skis may be necessary to replace Venetian gondolas if the weather in that Italian city does not moderate soon. Ice has clogged up the canals and lagoons which serve Venice as streets and traffic there by means of gondolas has become most difficult. The temperature has been as low as 15.5 Fahrenheit.

Married In California

Los Angeles.—Sir Rodmond T. Roblin, Canadian financier and former premier of Manitoba, and Miss Ethel M. Leggett, of Los Angeles, were married at the Whitehall Congregational church here, February 5. More than 100 guests attended the ceremony which was extremely simple.

Increase In Jersey Cattle

Toronto.—At the annual meeting of the Canadian Jersey Cattle Club held here reports of registration and transfers showed a marked jump, the figures for 1928 being 24,070, compared with 16,480 in 1927. J. W. McGilivray, Chilliwack, B.C., was elected a vice-president.

Alberta Keeps Own Police

Province Refrains Not To Make Change In System

Edmonton.—The Alberta Government will not accept the offer of the Dominion Government, that the Royal Canadian Mounted Police shall take over the police of this province from the existing Alberta provincial police force.

This much was made evident by Premier Brownlee in the legislature, and he gave as his reason the same reason that the Federal Government gave when they refused to remove the R.C.M.P. from the province—that they intended to have their own statutes enforced by their own police.

Radio For Peace River

Premier Brownlee Outlines Year's Plans For North Country

Edmonton, Alta.—Short-wave radio stations to link up isolated points of Alberta's north, pending the carrying of telegraph communication to such points; an intensive search for water in areas where water is scarce; three survey parties on soil surveys, and a survey party to examine the pre-Cambrian Shield in the northeast of the province for mineral possibilities, are among plans for the "Peace River" country this year, Premier Brownlee told the Alberta legislature.

FRANCE WILLING TO RENOUNCE PENSION RIGHTS

Paris.—A determined effort to insure the economic rehabilitation of Europe will be made when the international committee of experts' on reparations begins its sessions here.

Statement that France would waive nearly \$5,000,000,000 in pension rights granted her by the Versailles Treaty, indicates that a conciliatory spirit will be shown to promote solution of the tremendous financial problem left by the world war.

The treaty provided that Germany must pay the French pension bill, estimated to be 130,000,000,000 francs. France, it was understood, would demand from Germany only restitution for damage done to French property and a sum equivalent to the French war debt to the United States and England.

The problem of the experts is to determine how much Germany can pay without being crippled, and how many years she should be allowed in which to pay it. The exact total of reparations never has been fixed and it has become obvious that Germany never could pay the staggering total which the Allied nations would like to get—about \$30,000,000,000.

Economic experts point out that Germany cannot be stabilized economically or industrially until she knows definitely how much she has to pay and can regulate finances accordingly.

War debts will be treated as a corollary by the European experts, whose governments, in effect, hold that their debts to the United States must be paid out of German reparations. The United States has held consistently that the debts are a separate issue and are payable whether Germany provides sufficient reparations or not.

A third problem is the evacuation of the Rhineland. A plan is being considered to withdraw the troops and substitute an Allied commission of control in the Rhineland.

To Trap the World's Melodies!

The world will soon have another symphony! Rudolph Friml, the noted composer of Rose Marie, The Vagabond King and other musical successes, is chasing the globe in search of inspiration for a new work. With his folding bi-plane, he joined the Empress of Australia at Monaco, and will make the world cruise on her, searching India, the Orient and other points in the mystic east, for new and haunting melodies which will be sung and hummed and whistled the width and length of the globe.

FORMS FINANCIAL BUSINESS

C. Rice-Jones, who, until recently, was vice-president of United Grain Growers, has gone into the financial business in Western Canada, and has established his own company, C. Rice-Jones and Co., Limited. To devote himself to this business he has resigned from the Board of United Grain Growers, thus severing a connection which has continued during many years.

Prior to 1917, he was President and General Manager of the Alberta Farmers' Co-operative Elevator Company. He helped to bring about the amalgamation of that Company with the Grain Growers Grain Company to form United Grain Growers' Limited, and since 1917 has been first vice-president of the amalgamated company.

He has many friends in all the Western Provinces, and in addition is well known in financial centres. Mr. Rice-Jones has established connections with financial houses in Toronto, Montreal and New York, and is completing an organization of representatives in western towns and cities.

C. Rice-Jones and Co., Limited will be located in the Curry Block, Winnipeg, where a general investment service will be given on stocks and bonds, and, in addition, the company will participate in the underwriting of new issues of securities.

Ottawa Athlete Killed

Plane Crashed During Solo Flight At Camp Borden

Ottawa.—J. G. "Jerry" Ault, prominent athlete of this city, died as the result of injuries sustained at Camp Borden when the plane he was flying crashed. Mr. Ault, who was training for a pilot's certificate, was on a solo flight when his machine went into a tail spin.

A court of inquiry will be held at Camp Borden to determine the cause of the accident.

Succeeds Late Major Bell

Ottawa.—The appointment of A. C. Henry, director of the bureau of railways, succeeding the late Major Graham A. Bell, has been announced by the prime minister. Mr. Henry takes up his departmental duties with the same salary as his predecessor—\$10,000 per annum.

Enjoying Mild Winter

Copenhagen.—The Greenland Administration Department reports that the country was enjoying an unusually mild winter. There was virtually no ice or snow, it was said, and the temperature was equivalent to approximately 45 degrees Fahrenheit.

Starving Crowds

Raid Food Stores

Hunger Crazed People In Besarabla Attack Emergency Stores Kishitiev, Besarabla.—Starving crowds of men, women and children attacked the emergency food relief stations here and smashed windows, wrecked furniture and seized the small remaining supply of food. To appease the hunger-crazed people, the government relief committee has promised additional food supplies. The government of Besarabla, which has been the centre of a desperate famine because of crop failure, held a special meeting of officials to discuss further measures for relieving the situation which has been greatly aggravated because of the non-arrival of food trains which are marooned in heavy snow between Besarabla and Bucarest.

Injuries Proved Fatal

Workman For Paper Company Caught In Gear Of Machine

North Bay, Ont.—Despite the effort of a gang of men armed with acetylene torches who cut through gears and shafts of a huge bleaching machine to release him, and the chartering of a special train to rush him to hospital, William Ashcroft, an employee of the International Paper Company, died from shock and loss of blood.

Ashcroft's leg was caught in the gear of the big machine, and, owing to the nature of the mechanism, the gears could not be reversed. The torches were immediately employed and the machine literally cut to pieces. A special train rushed him to hospital in Mattawa, where his right leg was amputated. The shock proved too severe and he died a few hours later.

Death Of Bremen Flyer

Baron Von Huenefeld Succumbs To Operation In Berlin Sanatorium

Berlin.—Baron Ehrenfried Gunther Von Huenefeld, one of the three men in the aeroplane Bremen, which was the first to accomplish without a stop the westward crossing of the North Atlantic, is dead after an operation in a Berlin sanatorium.

Born in Koenigsberg, the son of a Prussian army officer, Von Huenefeld was never strong. When he offered himself for service during the great war he was rejected on the score of his "weak physique." He persisted, however, and was finally accepted as a motorcycle dispatch carrier.

Gain In Ship Production

Great Britain and Ireland Lead Lists In Total Tonnage

New York.—Lloyd's register of shipping has announced that an increase of nearly 20 per cent. in the world's production of merchant vessels was established in 1928. Great Britain and Ireland, which lead the lists in total tonnage had the largest percentage and all maritime countries except the United States shared in a 400,000 gross tons increase over 1927.

New tonnage launched in the United States was only slightly more than half the 178,218 tons aggregate for 1927, but Great Britain and Ireland gained 18 per cent. and all other countries combined 32 per cent.

AIR SURVEYS FOR LAST YEAR BREAK RECORD

Ottawa.—The pre-eminence of aerial surveying for mapping Canada on account of great speed combined with a wealth of detailed information was the keynote of the report of the Aerial Surveys Committee presented by B. W. Waugh, D.L.S., to the annual convention of Dominion Land Surveyors. Although aerial surveys were inaugurated in Canada only seven years ago, they are rapidly becoming a most popular method of mapping was the statement of the committee.

During last season, which was a record for Canadian operations, 60, 149 square miles of territory were photographed by "vertical" and "oblique" photography. In Nova Scotia, 2,870 square miles were photographed. In New Brunswick, 823; Quebec, 12,382; Ontario, 17,099; Manitoba, 7,635; Saskatchewan, 14,000; Alberta, 4,800, and British Columbia, 4,604. Altogether, 106,122 photographs were taken, said Mr. Waugh.

TOWNSITE PLANS FOR CHURCHILL ARE DISCUSSED

Winnipeg, Man.—Townsite plans for the Port of Churchill on Hudson Bay, it is understood were considered when Col. A. E. Dube, D.S.O., chief engineer of the department of railways and canals, Ottawa, met H. D. G. McKenzie, provincial secretary and minister of mines and natural resources, here.

Colonel Dube arrived on what he said was a rush trip to the city and shortly afterward was joined at the Fort Garry Hotel by Mr. McKenzie. Neither Colonel Dube nor Mr. McKenzie would state what their purpose was, but it was authoritatively stated that the subject of their discussion was the townsite at Manitoba's seaport.

It is understood that the question of the port's townsite has been under consideration at Ottawa and Winnipeg for some considerable time.

About the last official pronouncement about it came from Major Graham Bell, the late deputy minister of railways, in August, 1927. At that time he said, "I wish to warn all prospective purchasers that there is no land or town lots for sale in the vicinity of the proposed harbor site."

To Protect Gold Reserve

Bank of England Raises Rate One Per Cent

London.—Directors of the Bank of England raised the bank rate 1 per cent., lifting it to 5½ per cent. from the 4½ per cent. level at which it had rested since April 21, 1927.

The necessity for this measure to protect the bank's gold reserve from inroads through shipments to the United States had long been recognized in the money market, but it had been hoped that a working agreement between the central institutions of the U.S. and the U.K. would have devised some measure of assistance before this.

The net outgo of gold from the Bank of England in one week was more than \$3,000,000, reducing the bank's stock to less than \$19,000,000, the highest level in the U.S. was in an endeavor to raise the sterling rate of exchange and to check the outflow of gold.

Autos Take Heavy Toll

Vancouver, B.C.—Thirty persons lost their lives in automobile accidents in Vancouver during 1928, and 723 others were injured in a total of 10,528 accidents reported, according to police statistics just published. Automobile accidents for the entire province of British Columbia during the year numbered 87,500, against 77,000 in 1927, and an average of three persons were killed for each 1,000 automobiles operated.

Liquor Billed As Asbestos

Winnipeg, Man.—A carload of liquor, valued at approximately \$60,000, was seized by a combined gang of city police and provincial enforcement officers in St. Boniface. This liquor was billed as asbestos, the bill of lading showing that the shipment had been made by the Canadian Asbestos Company, Ltd., of Cote St. Paul, Montreal, to the Winnipeg Roofing Company.

Figures Show England Going Dry

London, England.—Of its own accord England is going dry. At least, if the consumption of spirits declines in the future as it has in the past 28 years. In 1900, the consumption of spirits in England was 22,229,522 gallons. Last year's figure is but 10,412,921. Other means of recreation, such as the movies, radio, etc., are given as the reason for this decrease.

Liquor Profits For Charity

Quebec.—In the legislative assembly Hon. Athanasie David, provincial secretary, announced that the sum of one million dollars would be taken from the profits of the Quebec liquor commission next year and turned over to the charities bureau in further aid of charitable institutions.

Will Build New Cruisers

Washington.—An increase in the United States navy by 15 cruisers and an aeroplane carrier has been voted Tuesday by the senate, 60 to 12, with the stipulation that the ships be laid down before July 1, 1931.

Zeppelin Plans New Trip

Friedrichshafen, Germany.—The dirigible Graf Zeppelin is to start the end of February on a round trip to Egypt and Palestine.

NOTES AND COMMENTS

A merchant voices a complaint. He is confronted with the same difficulty that all retailers experience—that is mail order selling, and asks the Journal to say something about it. This paper has stated its views on mail order buying very emphatically, but it realizes that this will not effect a remedy. It is true as the merchant states, that local trades organizations will ask merchants to donate towards their various efforts by purchasing space on programs, by selling their goods at cost and in other ways assisting them, yet individually they will send their cash business to the mail order house. Now this is not playing fair with the local merchant. True, working people must spend their dollars to the best advantage, but at the same time if they wish local stores to remain in business and give them service at any time it is required, they must realize that making all of their cash purchases from mail order houses is helping to cripple local businesses, and detract from the service which they demand from local retailers.

Music is a great aid in creating atmosphere at the movies. A fine picture will often be spoiled by music entirely unsuited to it. At a time when there should be subtle strains stealing forth from the orchestra pit, you often hear wretched jazz which is so entirely out of harmony with the subject of the picture that it produces the same effect as discordant music. Movie producers take the trouble to have suitable music accompany their pictures, knowing full well what a help it is and how acceptable to the audience, but amateur orchestras take the line of least resistance and play any old thing they happen to know. This is a common experience of movie fans in small towns. When the heroine is dying the chances are that the musicians will play the grand march or a lively two-step, possibly to hasten her along. Far better if there is no suitable music available that the audience be spared the agony of conflict which the opposite effects in the picture and the music will produce.

While on the subject of the movies, the "talkies" are being perfected to such an extent that in a Calgary theatre the entire program is carried through without a house orchestra or even a pianist, all the music required for a two hours' program being reproduced with the pictures shown. This ensures complete harmony and is very pleasing. We cannot expect to have such programs in the smaller centres, even though in Coleman quite often big feature pictures are shown ahead of the cities of this province, and for this the local management are to be commended for their enterprise. The pictures play such an important part in the lives of people nowadays that everyone is more or less interested, and there is much connected with them that can rightly be classed as news.

A weekly newspaper on The Journal's exchange list makes some interesting comment on the liquor store profits, stating that in its particular town \$30,000 is taken out of local circulation in profits alone by the government liquor department. With the enormous profits recorded last year, possibly he is conservative in his estimate. The profits would be considered outrageous if the goods were being sold by private concerns, but of course you don't have to buy. Some people might urge the government to still further increase the price, and so deter people from purchasing it. The evil result of this would be that the path of the illicit liquor distiller would be made easier for the disposal of his wares. It is a hard problem to solve. High costs of liquor, and education of the people as to its uselessness in this day and age will possibly eventually eliminate the sale of whiskey.

Variety is the spice of life. This is the reason of us sometimes printing a lot more news than there is advertising, or vice versa. Our ideal would be to print an equal volume of each weekly, but it cannot be done. At least we frankly admit we cannot. Every two weeks there is a pay-day. Then is when the merchant

Mrs. Falloon received a telegram on Tuesday morning stating that her daughter Mrs. G. Platt, was seriously ill at her home at Great Falls, Mont. Mrs. Falloon left on Wednesday night to be with her daughter.

Miss Gladys Price entertained a number of young people at her home on Saturday evening. Cards and dancing furnished a very enjoyable evening.

CELEBRATED SINGERS COMING TO COLEMAN

Distinguished Singers From Old Cathedrals Will Give Program Here

The officers of St. Alban's church have arranged for the appearance here in the near future of the celebrated Westminster Glea Singers, who are touring Canada, en route to Australia, where they are booked for an extensive tour. Recent press notices from eastern cities indicate that they are meeting with splendid success, and the following introduction to a report from the London Advertiser is interesting: "Under the distinguished patronage of H. E. the governor general, Lord Willington, the Westminster Glea Singers are now presenting a recital at the Grand Opera House. This body of singers enjoys a unique reputation. It is composed of men and boys selected specially from the greatest of English cathedral choirs and constitutes a complete choir with a repertoire of 180 pieces. Some of the finest voices from Westminster Abbey, St. George's, Windsor, Christ Church Cathedral and old St. Paul's are included in the organization, which was established by Edwin Braconne, formerly and for ten years solo tenor at Westminster Abbey, for a tenor of the British Empire.

The soloists include such noted singers as Edwin Braconne himself, Donald Reid, solo alto at St. Paul's Cathedral, in addition to a marvellous body of boys' voices composed of choristers representing the finest type of English cathedral singing.

Miser Dies From Injuries
A miner named Wolf, a native of Montenegro, employed in McGillivray mine, was caught in what is known in mining terms as a "squeeze" on Tuesday and badly crushed. It happened about 6 p. m. and he was so badly injured that Dr. Borden considered it inadvisable to move him till about 10 p. m. He was suffering so badly from shock that he could not be operated on and he died at 1 a. m. He has no relatives in Canada. His partner escaped injury.

The illustrated address given by Mr. Kerr of Passberg in the United church on Tuesday evening on "A Visit to the Old Land" was greatly enjoyed, and in addition to that subject, some very fine views of mountain scenery in the vicinity of the Crown Nest Pass were shown on the screen.

Here and There

(223)
Large cargoes of wheat are being shipped to Japan and the Orient through Vancouver these days. It seems like sending coals to Newcastle to send flour to "The Flowery Kingdom."

Some foundation for the old nickname "woolly" west is found in the report that Alberta's wool output for 1928 amounted to 3,033,181 pounds. Altogether the Dominion produced over eighteen and a half million pounds.

Steel is replacing wood in freight service on the Canadian Pacific Railway as 7,500 box cars now on order for the company will be of steel construction. They will have a capacity of about 2,000 bushels of grain and a load of 120,000 pounds.

Fur-farming is developing many branches, one of the most recent being the organization in Manitoba of the Manitoba Muskrat Breeders' Association. The body plans to study muskrat breeding conditions and to investigate all phases of the industry.

In a recent speech at Kitchener, Ontario, E. W. Beatty, chairman and president of the Canadian Pacific pointed out that the average freight rate per ton per mile in Canada is about 2 1/2 per cent lower than in the U.S., and that the average of Canadian grain rates is 40 per cent lower.

The Trans-Canada will cross the continent in an hour and a half less time eastbound, and an hour less westbound than it did last year. This does not mean that Canada has got any smaller, but that the Canadian Pacific Railway is running the famous flyer on an improved schedule.

Penny postage, inaugurated at Christmas, is working well and bringing about a notable increase in letter mail from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of a year would be such as to offset the \$200,000 estimated reduction in revenue by the penny rate.

In Manitoba, there is one tractor for every 4 1/2 farms; in Saskatchewan, one for every 4 1/2 farms; and in Alberta, one for every 7.5 farms. If all the tractors were hitched together, how long could it take a sawage mill to reach the moon.

For the sixth successive year Dean Sinclair Laird of Macdonald College, Ste. Anne de Bellevue, Quebec, will conduct an all expense tour across Canada and back, starting from Toronto on July 22 and lasting for 21 days. The party travels in a special train with a baggage car filled up as a sixty-foot dressing-room.

Equipped with a bow-rudder, a new device that will aid in navigating the harbours of Victoria and Vancouver and the waters of the British Columbia coast, the Princess Norah has arrived on the Pacific seaboard to join the fleet of the B. C. Coastal services of the Canadian Pacific Railway. She is the eighteenth ship to be built for this work and has just been constructed at the shipbuilding yards on the Clyde in Scotland.

"Abie's Irish Rose", enacted by a master cast, including actors from the original play. Palace on Friday and Saturday.

BABY CHICKS—Canada's Bred-to-Lay, 100 per cent alive guaranteed. Breeding certificate sent with chicks from tested, trapezoid Leghorns, Barred Rocks, Reds, Anconas, Minorcas, Wyandottes, Orpingtons. A 12-month Poultry Course Free. Incubators, Brooders Free Catalogue. ALEX. TAYLOR'S HATCHERY, 302 Furby Street, Winnipeg, Man.

In Ancient Egypt

The art of brewing was known and practised for many hundred years before the Christian era. In 450 B. C. we are told that the Egyptians being without vines made a wine of beer from corn. Pliny and Holianicus inform us that the Egyptians are thought to have derived their taste for "Zythum" (meaning a barley drink) "because it was so necessary for human bodies."

Today malt beverages, BEER, ALE and STOUT are considered health drinks.

"Where BEER has once been introduced, it has generally become the national beverage" *Ency. Brit. on "Brewing"*

Necessity Of Sowing Pure Seed If Grower Expects To Secure Highest Returns From His Farm

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut.

The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed, if we expect to reap the highest returns from our farms.

The wide-awake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seedling time arrives to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Modern Experimental Station, in regard to seed grain, is to clean all grain intended for seed purposes shortly after freeze-up and to forward two-pound samples to the Dominion Seed Branch, Winnipeg for grading and germination test.

With the long winter days, when the farmer has ample time to spare, why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the time to get busy. Don't delay, but secure your seed early, then you will have no worries about seed grain when spring comes up.

In a seed grain survey made in Manitoba, one farmer was sowing seed supposed to be Marquis, but upon analysis, only 60 per cent. was Marquis, while the other 40 per cent. consisted of weed seeds, and other varieties of grain.

We cannot hope to produce grain that will maintain our high standards on world markets if more attention is not given to the seed we sow. Experimental Farm Note.

Canada's Northland

Department of Interior Is Exploring Northwest Territories

Much is being done by the Department of the Interior to organize and explore the vast territories lying to the north of the prairie provinces. It is fully realized that development of the natural resources will depend on a robust native population and an abundance of wild life. In conformity with this realization game preserves have been set aside for the sole use of the natives; expert investigators have been detailed to examine and report on wild life conditions; experiments have been conducted with a view of the introduction of new species of animal life, and regulations have been enforced with regard to the destruction of predatory animals.

Solved the Difficulty

My little niece's mother was trying to get the hated spinach down the child's protesting throat!

In the middle of her attempts Shirley—who is three and also at the make-believe stage—said, "Let's play, Mamma."

"Well, all right," answered mother. "What shall we play?"

"Let's play you're the little girl and I'm your mamma."

"Very well," agreed her mother.

"Now you eat the spinach!" commanded Shirley.

Kid: "My father is a radio announcer."

Kid: "So is mine."

Kid: "Well, I bet my father is worse than your father."

"Are you a doctor?" she asked the young man at the soda fountain.

"No, madame," he replied "I'm a fizician."

"I want your legal help. Schuls knocked out one of my teeth."

"I will get you compensation."

"But you can't get compensation from a dead man."—Lustige Blätter, Berlin.

W. N. U. 1772

Influence Of Sunlight

Experiments Show Pigs Eating Out-side Take Less Feed

In recent Iowa swine feeding tests one of the important observations made was the effect of sunlight on nutrition. Those pigs that were fed out in the open made about the same daily gain as the ones fed inside. But they did it on less feed, states a writer in Live Stock Markets.

The pigs fed inside required an average of 425 pounds of feed for each hundred pounds of gain to reach a weight of 225 pounds, while those fed in the sunlight reached the same weight with only 391 pounds of feed for each hundred pounds increased weight. The outside fed pigs made \$1.02 more per head over feed costs than did those fed inside.

John M. Edward, in charge of the experiments, thinks sunshine was responsible. He is convinced of this because the outside fed pigs did not do nearly so well during the early part of the feeding season when the days were short and cold. After the days became longer and more mild, there was a marked improvement in gains.

The conclusion is that probably in midwinter, it is well to feed pigs inside. They should, however, have alfalfa hay as a source of vitamin D to take the place of the sun's rays, and to aid in assimilating minerals. As soon as the days lengthen and the weather becomes more mild feeding outside will pay.

Winnipeg Newspaper Union

Jacky

At the end of 1928, savings deposits in the chartered banks of Canada stood at \$1,390,082,201, which represents a per capita deposit for the Dominion of about \$140.

First Wife—"How long had you known your husband before you were married?"

Second Ditto—"I didn't know him at all. I only thought I did."

Paris Model

A charming little Parisian model smartly shirred across front, fastened on English print with white pique collar and cuffs. Fashioned of printed wool jersey, with plain self fabric contrast, navy blue waist, tan linen with brown French blue sateen with tiny white polka dots with white pique or pale blue chambray, are very striking and serviceable. Design No. 503 comes in sizes 2, 4, 6 and 8 years. The 4-year size requires 2 1/2 yards of 36-inch material with 1/2 yard of 36-inch contrasting. Pattern for full cut bloomers gathered to kneebands included. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Key To Markets

The Canadian Agricultural Product Review, in Great Britain, W. A. Wilson, claims that the quality of Canadian bacon is satisfactory to the British trade. The key to the markets now, he says, is "production." Greater numbers of hogs and a steady increase every year are what the British buyers of Canadian bacon would appreciate most.

"Pop, how many legal holidays are there this year?"

"I dunno, son, better ask a bank clerk."

Best Peas For Canning

Experiments Show Alaska Variety Gives Highest Yield

The canning of peas has grown to an industry of considerable extent in many parts of Canada. In the province of Nova Scotia it has become an established industry. To find out the best varieties of peas to grow for this purpose a series of experiments was carried out at the Experimental Farm, Nappan. The important factors looked for as described in the report of the superintendent, published by the Department of Agriculture, Ottawa, in the varieties were uniformity of ripening, freedom from worms and disease, and the yield of crop. The variety Alaska, gave the highest yield of 7,893 pounds of marketable seed to the acre. This variety produces a smooth round pea, with pods well filled that ripen fairly uniformly and has the appearance of excellence for canning purposes. Horsford Market Garden, yielded at the rate of 5,445 pounds of marketable crop per acre. This variety did not ripen as uniformly as Alaska and is more susceptible to blight at the base of the stem. The Lincoln gave 6,816 pounds of crop to the acre of a very smooth round pea that is slow in developing. Advancer, a pea of medium size lacks uniformity in ripening and blights early. It yielded 5,445 pounds of marketable seed per acre.

Wealth And Wisdom

Getting Of Gold Does Not Require Exceptional Ability

"And where shall wisdom be found?" Mr. Julius Rosenberg, a man of great fortune, replies in a "mousetone" that it is not in mere wealth. Most people, he says, believe that because a man has become wealthy, his views on any subject are valuable; but he holds that most large fortunes have been made by men of mediocre ability who "tumbled into a lucky opportunity."

The friend of Job who came to comfort him said that wisdom could not be "gotten for gold."

Mr. Rosenberg's 20th century corollary is that getting of gold does not imply special wisdom in the getter.

Canadians Saving Money

At the end of 1928, savings deposits in the chartered banks of Canada stood at \$1,390,082,201, which represents a per capita deposit for the Dominion of about \$140.

Artists' Blunders

Many Statues and Paintings Very Glaring Errors To Observant People

Not one person in 10,000 probably, who passes every day the famous "Bodhisattva" statue on the Embankment, in London, England, has ever observed the gross blunder made by the sculptor. The group represents this early queen in a chariot drawn by four horses who are attached to the chariot by traces. But there were no such things as traces when the Queen of the Iceni went forth to battle.

In front of Westminster Hall, a few hundred yards away, is the statue of Oliver Cromwell. The Protector is in riding costume, but experts allege that he is wearing his spurs upside down.

Many other blunders of the same kind were indicated in a lecture given in London, England, by C. H. B. Quennell at the Royal Institute of British Architects.

There was the well known picture of the Pilgrim Fathers which contained an anachronism. The sailors were holding a Union Jack, which did not come into existence until 1801, a century and a half after the sturdy Pilgrims had left England.

Copley's famous canvas "Death of Chatham," in the National Gallery, led many to suppose that the great minister died in the House of Lords. He was in a very weak state when he went down to the House of Lords to make his great criticism of the Government's policy in the American War. He had a fit, but recovered, and did not die until five weeks later at Hayes. In Raphael's cartoon the "Miraculous Draught of Fishes," laid out at South Kensington, were fish never caught in the Sea of Galilee. No one had seen the skate there.

More Letters with Penny Postage

Penny postage, inaugurated at Christmas, is working well and bringing about a notable increase in letter mails from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of a year would be such as to offset the \$200,000 estimated reduction in revenue by the penny rate.

Fox Farming a Success

The Great West Silver Fox Farm, located about four miles from Princeton, B.C., made a shipment of 24 silver foxes to New Westminster the other day. There are now more than 100 cubs on the local farm, which is meeting with pronounced success in the commercial breeding of foxes.

Practical Results Are Obtained From Research Work Done In The British National Museums

Make Good Hay Crops

Peas Made With Oats and Barley Were Successful

Oats and barley, when the varieties are carefully selected, make very good hay crops. At the Rothamsted, Saskatchewan, Experimental Station five varieties of oats and one of barley were tested and the results of the test have been published in the report of the station for 1927, published by the Department of Agriculture at Ottawa. The varieties of oats tested were Banner, Victory, Gerlach, Gold, Rain and Liberty. Each variety was cut at the time of heading out, then two weeks later, and again when turning. The crops cut at the turning period made a rich hay on account of the high percentage of kernel. The straw at this stage was also quite palatable. The crop cut at this stage also gave the highest yield of cured hay. Banner gave the best returns, though Victory, Gerlach and Gold Rain were also high. In the average of three cuttings, Gold Rain, Victory and Banner showed good returns and proved their suitability for annual hay purposes. In a three-year average of all cuttings Gerlach was the highest yielding, though the difference in its favor was only slight. Liberty, though a light yielder, produced the finest quality of hay. The barley used is known as feeder barley, an awnless variety, the straw of which remains green until the grain is nearly ripe. The yield from this was lower than from the oats but the hay from it is more palatable to live stock. In a three-year average the yield from the Gerlach, the highest, was two tons 804 pounds per acre. The lowest yielding oats, Liberty gave almost 1 1/2 tons to the acre, while the hay from the feeder barley produced slightly over two tons from an acre of land.

Western Canada's Grain Elevators

According to federal figures there are now approximately 4,700 country grain elevators in western Canada, with a total capacity of about 150,000,000 bushels, as against 4,437 in 1927, with a capacity of 147,000,000 bushels. The storage capacity of the terminal elevators at Port Arthur and Fort William, at the head of the Great Lakes, was increased during 1928 from 73,000,000 bushels to 86,000,000 bushels.

One Example is sufficient to prove the practical advantage to the Empire and the world of the Royal Botanic Gardens at Kew. The cultivation of rubber and the industries dependent on it represent a value of hundreds of millions of pounds, and have become possible through the agency of Kew. In June, 1876, F. E. Wickham arrived at Kew with 70,000 seeds of the Brazil rubber tree, which he had been commissioned by the Indian Office to collect. These were sown in a space of 300 square feet. Some 2,500 germinated, and in August 1900, were sent to Ceylon in charge of a skilled gardener. About 17,000 reached Dr. Thwaites at the Peradeniya Botanic Gardens in excellent condition. The plants were established in Ceylon, and the plantations of Para rubber in India, Burma, Malaya, and elsewhere are the result.

At the Museum of Practical Geology the expert staff are constantly giving advice and information on ores and minerals of economic value, and on gems and ornamental stone. The Science Museum is designed to illustrate and aid the application of science to all branches of industry, and these functions it performs by a magnificent library and by loan collections and apparatus.

A Sad Reminder

Mrs. Smith, just back from Europe, said to Mrs. Jones:

"I just couldn't bear looking at the ruins in Italy. They made me so homesick for my husband."

"Homesick for your husband?"

"Yes, you know, Henry has fallen arched."

Your work would not be so hard if you put more humor into it.

Is that number 97?

"No, it is number 66, but I turned the number upside down on the ticket."

—Lustige Blätter, Berlin.

Collegiate Tours Enable Students to See Old World Attractions at Small Expense

A FELLOW FIGHT

STUDENTS AT ANNE HATHAWAY'S COTTAGE, STICHTER-ON-ROON

DECK TENNIS

DANCING ON DECK

The advent of Spring and early Summer will see thousands of care-free young men and women; college students, teachers, doctors, lawyers, artists and other professional folk picking their suitcases, bidding adieu to their friends, and boarding ocean liners for a voyage to Europe. Not so long ago trips of this kind were confined to a few fortunate folk with a good deal of money at their disposal, but nowadays the Collegiate Tours, organized by the Art Crafts Guild of Chicago in conjunction with the Canadian Pacific Steamships, has enabled young people and others of limited means to travel and see the world. In former times a superficial knowledge of one's own country was considered sufficient for the ordinary person but in these days of intense competition it is acknowledged that some idea of other countries, particularly those of the Old World, is desirable both from the standpoint of an employer and from that of the person who would deem himself or herself really well informed.

These collegiate tours which leave several times a month from Montreal and Quebec, offer steamship accommodations varying from the increasingly popular and economical tourist third cabin to the regular cabin class. They are conducted by experienced people and offer varying itineraries including England, Holland, Belgium, France, Germany, Switzerland, Italy and other countries. "Tourist Third" must not be confused with regular third class, for it is a recent innovation in overseas travel and provides good, clean, comfortable surroundings, an appetizing well-prepared menu, jovial and well-bred travelling companions and the run of a large part of a first-class liner at a very considerable reduction over the regular first cabin and cabin prices.

The St. Lawrence route to Europe is extremely picturesque and provides a river voyage of 1,000 miles before the open Atlantic is reached. Deck tennis, bridge parties, dancing on deck and other forms of entertainment speed the voyagers on their way.

The Natural History Museum, in South Kensington, the Science Museum in Exhibition Road, the Museum of Practical Geology in Jermy Street, and the Royal Botanic Gardens, with the Herbarium and Museums at Kew, are four great scientific museums in the London area maintained solely or chiefly from public sources. Each has its visitors of the sightseeing kind. Each has its clientele of serious specialists, who visit the collections with a defined purpose and who know something of the continuous research that lies behind the public exhibitions.

Those museums however, and their trained staffs have an immediate practical utility, on which much stress is laid in the latest report of the Royal Commission on National Museums and Galleries, because they are an invaluable and not sufficiently recognized agency in the development of industry and of industry in the future. A much larger part of the time of the staff than is generally understood is occupied not merely by curating and abstract research, but in studying and advising on problems of immediate practical moment.

Insects dispute man's lordship of the earth more seriously than any other living creatures by direct attacks on his food, his health, and his habitations. If an insect plague is to be fought the exact species must be identified as a first step towards distinguishing between harmful and harmless and towards leading out the weakest point in the life history against which measures may be taken with most chance of success. Advice is sought from the staff of the Natural History Museum. The whaling industry is recognized to be in grave peril from reckless exploitation. When it was decided to collect knowledge on a sufficiently broad basis for the devising of international protection and regulation the Natural History Museum was at once called on. The scientific staff of the Discovery expedition is now at work at the Museum examining the results of their inquiries in southern seas.

One example is sufficient to prove the practical advantage to the Empire and the world of the Royal Botanic Gardens at Kew. The cultivation of rubber and the industries dependent on it represent a value of hundreds of millions of pounds, and have become possible through the agency of Kew. In June, 1876, F. E. Wickham arrived at Kew with 70,000 seeds of the Brazil rubber tree, which he had been commissioned by the Indian Office to collect. These were sown in a space of 300 square feet. Some 2,500 germinated, and in August 1900, were sent to Ceylon in charge of a skilled gardener. About 17,000 reached Dr. Thwaites at the Peradeniya Botanic Gardens in excellent condition. The plants were established in Ceylon, and the plantations of Para rubber in India, Burma, Malaya, and elsewhere are the result.

At the Museum of Practical Geology the expert staff are constantly giving advice and information on ores and minerals of economic value, and on gems and ornamental stone. The Science Museum is designed to illustrate and aid the application of science to all branches of industry, and these functions it performs by a magnificent library and by loan collections and apparatus.

A Sad Reminder

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 60 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XIV.—Continued.

"To hell mit him!" shouted Hand. "He don't dare do it. Tush him."

But the mob did not obey their rash command. Donald's pale face and burning blue eyes were sufficient evidence that he made no idle threat. Donald saw the big hand of his foreman stealing to the butt of the heavy Colt that hung at his side. "Keep cool, Jack," he begged, "don't start anything."

For days Gillis had been without sleep. He turned bloodshot eyes on Donald. "By G—! I would like to take a crack at Hand," he said in a voice thick with rage.

The hostile crowd did not advance; rather did they leave. Settled in groups, they lay or sat on the hillside to shout occasionally words of derision at Donald's faithful crew.

Donald's nerves were on edge. At any moment there might be a pitched battle with loss of lives. He studied the faces of the strikers to see how many were from his crew and was surprised to recognize fully 40 of his men. He saw "Blackie" in the rear of the crowd of strikers. When his eyes met Donald's he turned away shamefacedly. All the men from his camp refused to meet his gaze squarely. "Those men are ready to come back right now," he said to Gillis. "Hand has bullied them into this. Don't you think so?"

"I don't know," answered Gillis. "I never thought Blackie would go back on me. I'll wring his d—d neck when I catch him in town!" he added bitterly.

Donald heaved a slight movement behind him, and turned to see Connie standing with her rifle in the crook of her arm.

"Good heavens! Connie, you shouldn't be here!" he exclaimed.

Connie's face bore traces of weariness and sleeplessness. For three nights she had stolen softly away from her cabin on the hillside to lie hidden outside that of Donald. By night she had kept up a weary vigil, ever on the alert; in the forenoon she had lain behind a stump on the hill with eyes on Donald's tall figure whenever he came in sight, her rifle ready for instant action.

Hand did not know that death had nearly claimed him when he stepped forward to urge his men to charge. At that crucial moment Connie's rifle was aimed at his heart.

"Get away from here at once, Connie!" said Donald, angry, but kindly. "Lower your eyes to her or she'll shoot you dead—that was warning."

FLU Germs Breed In the Throat.

First! Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nervilleine. Half a teaspoonful of Nervilleine in water makes a most efficient gargle. The germ-killing properties of Nervilleine quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nervilleine. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nervilleine and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

coarse life was one that would cause any decent man to see red.

Donald stiffened. His face turned livid. "You dirty cur!" he fumed. "Don't you know that there is a lady present? You apologize to this little girl or I will whip you within an inch of your life!" His voice trembled with passion.

"Lady," scoffed Hand, "vat you call a lady? She moost be nice lady, runnin' in de woods wit' you ev'ry Sunday."

A murderous look shot from Donald's dark eyes. A terrible rage possessed him, a rage that made his blood beat not in his veins and gave him the unnatural strength of a madman. A dull red flamed in Connie's tanned cheeks. She sat down and covered her hot face with her hands.

Andy now came running from the cook-house, dressed in white cap and apron, his rifle trailing at his side. "What's goin' on, Donnie?" he questioned.

Donald did not answer. Gillis spoke to Andy in an undertone. "My God, Donnie, 'e's twice your size! Don't fight 'im!" implored Andy.

"I'll kill him!" rasped Donald. Gillis seized his arm. "Let me fix the d— skunk; 'e's nearer my size."

"No, this is my affair!" shaking himself from the grasp.

The sound of a paddle came from below, and the trapper sprang from his dugout and came swiftly up the hill. An Andy briefly explained the situation the old man's grey eyes narrowed to more slits beneath the shaggy brows.

"Ah!" he breathed. "Me and 'Peggy' puttin' his sh—about 'em. Likes to shoot up bounks. We shoots them in the heel so's to save their clothes." His mouth was set in a grim smile, a smile that was belied by the steady look in his deep-set eyes. He seated himself on a log and placed his gun on his knees.

Donald had by this divested himself of coat and shirt and now stepped forward dressed in light cotton trousers, a sleeveless undershirt and moccasins. "Hand," he said in a steady voice, "this is between you and me. See to it that your men do not interfere; I will vouch for mine."

The big foreman was rubbing his big hands as though in pleased anticipation. "I suppose you know how we is goin' to fight? Everything goes, you know." His grin was fiendish.

Donald knew what was meant. There were to be no rules of combat; no time duration; no referee; no rounds, and was to the man who should go down. It was to be a battle of primal man. He felt that his men do not interfere; I will vouch for mine."

(To Be Continued.)

Help Would Be Welcome

Prosperity Enjoyed in Canada Should Make People Generous

The British government, according to a burden of taxation never before borne by any other nation in modern history, has done all that was humanly possible in the way of providing state safeguards against the conditions which now prevail. Yet stark poverty stalks through the land, and semi-starvation and exposure have combined to make an attack on a people which a disease epidemic would change into a tragedy that would strafe the entire English-speaking world. At the distance beyond the control of the stricken people are responsible for their adversity; circumstances largely beyond our own control have made Canadians so prosperous as to be able to extend a helping hand—at once.—Toronto Globe.

How He Understood It

One day, in the third grade reading class, the teacher was telling a story of a dog and a fox. When she came near the end of the story she said, "And the cunning fox jumped up on the stone wall and ran along it, and the dog lost his scent."

When she finished the story she called on the little Italian boy in the class to repeat the story. Joe started all right, but as he came to the end of the story he said, "Ar de cunning fox, he jump up on de stone wall an' run along it, an' de dog, he lose his penny!"

Largest in World

The Canadian Government Experimental Farm system now embraces twenty-seven farms, seven sub-stations, one horse-breeding station, one fox ranch, ten plant pathologist laboratories, and 200 illustrations stations at different points in the nine Provinces of the Dominion. The system is the largest of its kind in the world.

Christie's Biscuits

The Standard of Quality Since 1853

Safest and best for Children or Invalids because they are Christie's Arrowroot Biscuits.

In the store or on the 'phone always ask for

ARROWROOT

Recipes for This Week

(By Betty Barclay)

GRAPE MOLD

5 tablespoons quick-cooking tapioca.
½ teaspoon salt.
1 pint hot grape juice.
½ cup sugar.
1 cup shredded pineapple.
1 cup quartered marshmallows (if desired).
2 egg whites.
Lady fingers or strips of sponge cake.

Cook tapioca and salt in the hot grape juice in a double boiler 15 minutes, stirring frequently. Stir in sugar. Remove from fire and add pineapple. When partially cooked, stir in the marshmallows (if desired), and fold in the stiffly beaten egg whites. Arrange split lady fingers around sides of a glass bowl or around individual sherbet glasses. Pour in mixture and chill. Serve with whipped cream. Lady fingers or sponge cake may be omitted.

MACARONI WITH OYSTERS OR FISH

6 ounces macaroni.
½ teaspoonful salt.
1-6 teaspoonful pepper.
2 tablespoonfuls butter or a substitute.
1 pint oysters.

Cook the macaroni until tender in boiling salted water, drain, then season with the salt, pepper and butter. Oil a baking dish and put a layer of the macaroni into it, then a layer of oysters which have been carefully picked over, more macaroni, more oysters, and so on until the dish is full. Pour the liquor from the oysters over the top—there should be a cupful of this liquor—if there is not enough make up the deficiency with milk. Bake twenty minutes in a moderate oven—350 degrees F.—and serve with tomato sauce.

Cold left-over fish may be substituted for the oysters if desired, using left-over sauce or milk for the moistening in place of the oyster liquor.

The Carnival Of Noise

Much of It Is Unnecessary and Could Be Eliminated

The present high peak of street noises has been reached so gradually that many persons have not fully appreciated what they are allowing others to inflict upon them and have not stopped to consider whether, in fact, the various components that make up the existing pandemonium are really necessary and unavoidable. Each new addition has been accepted with astonishing complacency. The unattended motorcycle, the klaxon, the heavy lorry, the airplane, the steam tractor and the pneumatic drill, have been tolerated in turn. Each of these noisy inventions has been turned loose without let or hindrance and people have ceased to marvel at them or to wonder what diabolical invention engineering science will thrust upon them next.

Sore Corns Drop Off If You Use "Putnam's"

When you notice any sign of callos on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

A Clever Idea

The Durham Chronicle tells of a young man who visited a store in that town, purchased three dozen eggs on credit, took them to another store and sold them and used the money to buy gas for his car. This is probably the first instance of a thirty-six hen-power automobile.

Use Minard's Lintment for the Flu.

May Be the Reason

Women's feet are now two sizes larger than they were twenty years ago, according to an orthopedic expert. Is this because she has been trying to fill man's shoes.

Little Helps For This Week

"Give us this day our daily bread" Matthew vi. 11.

Master, help! From hour to hour. Lord, I need Thy saving power. Not to soothe tomorrow's woes. Not to bless tonight's repose. Now I hunger to be fed; Give today Thy daily bread.

Every moment hold my hand; Without Thee I cannot stand. Show my foot the place to tread; Step by step I must be led; Go before me all the way; Give me daily bread today! —Rose Terry Cooke.

What is this bread, O my God? It is not merely the support which Thy providence supplies for the necessities of life; it is also the nourishment of truth, which Thou givest each day to the soul. It is the bread of eternal life, giving it vigor, and making it grow in faith. Thou dost renew it every day. Thou givest within and without precisely what I need for its advancement in a life of faith and renunciation. For whatever happens to me each day is my daily bread, provided I do not refuse to take it from Thy hand and feed upon it.

A steadily increasing group of words making its way into the dictionary is that of dialectal, provincial and local words and expressions.

An official report states that five hundred kinds of material are used for men's shoes.

Don't Neglect

Bronchial Colds

Pneumonia, "flu" and other dangerous ailments develop from bronchial colds. To prevent trouble take Buckley's Ultra-Violet Rays, and that it cures and removes the virus. Different from all other remedies, it contains a valuable combination of proven vitamins. Sold by all druggists and grocers.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light lust strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out-buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

HOCKEY NOTES

Colman plays against Bellevue at the
place tonight in the first of the Wright
hockey games. The only one new in the
Bellevue hockey team is Beliveau. Beliveau
will play at Coleman on Tuesday evening.

Beliveau's team will make their
debut against Coleman in this series.
Beliveau's team will make their
debut against Coleman in this series.
Beliveau's team will make their
debut against Coleman in this series.

Mr. and Mrs. A. M. Morrison, who have
been very seriously ill for several weeks,
were discharged from the hospital this week.

The town constable of Coleman is
in a search for a man who has been
observed in his life that ad-
vertising pays—if you use your brains.
The man who has been damaging the
constable on buildings.
Maybe it was with Jack Frost.
Drumheller Mail.

NOTES AND COMMENTS

(Continued from Page 4)
The bigger business and ad-
vertising agencies. The off-week
business on the job, consequently
the annual is hard put to it to secure
the advertising revenue to pay
the other costs. But being deter-
mined to make it pay the way, it is
determined to continue to give pho-
tographic service and remain in exist-
ence. We necessarily have to plan
and budget. Others of course might
be able to run a newspaper in a
small town, but then they see things
from the outside only, which is
quite different to being on the inside
and looking outwards. Yet we must
make up our minds to pay out of it
and experience a real kick when we
are able to consider a man who has
been observed in his life that ad-
vertising pays—if you use your brains.
